# Global Liberty Institute

A non-partisan, global institute to promote social, economic, and political freedom

**The Global Liberty Institute (GLI)** is an independent, international, non-partisan institute for promoting freedom on a global level. We will generate actionable policies through a set of effective alliances with policymakers and the private sector to ensure individual and economic freedom and to safeguard the free exchange of ideas. We will focus on six key areas of analysis essential to these goals: fiscal and monetary policy for a free society; health care and autonomy; media neutrality and technology; education and free speech; entrepreneurship and innovation; and rational, data-based policies for low-cost solutions to energy and the climate.

## Our Approach:

- Prioritize policies with direct impact on personal and economic freedom
- Form a network of creative and disruptive leaders to provide a voice for freedom where it has been lacking in governments and international organizations
- Inform thinking at all levels of government: local, state, and federal through regional chapters, guided by our principles and strategies
- Develop the next generation of policymakers and leaders through our activities and programs
- Leverage new technologies for coordinating and disseminating our ideas

## Co-Founders and Co-Directors:

### **Joshua D. Rauh, Ph.D.**

Ormond Family Professor of Finance  
Stanford Graduate School of Business  
Senior Fellow, Hoover Institution  
Senior Fellow, Stanford Institute for Economic Policy
